

AQUASCAPE®

Water!
We made it
an industry
in India.

CONCEPT & DESIGN - BlackTableCreativzIndia : 9867409969
www.blacktablecreativz.com

Aquascape is one of the pioneers that led the water leisure revolution mushrooming in India nearly twenty five years ago. The Company started out developing and constructing swimming pools but was quick to focus on international products and technology.

Aquascape made water an industry. Technologically superior products from Germany were soon followed by water parks, wave generating products, ceramic pools and spas from European countries and USA, placing Aquascape way ahead of any competition.

Today, after two decades of Research & Development Aquascape has positioned itself as a brand leader offering safe, chemical free, water management. The Company's technical collaboration with dinotech GmbH, Germany's Pool & Wellness Technology major, has placed it right on top of the

industry's growth curve and aligned to international standards.

Several projects all over India bear testimony to the degree of services and expertise Aquascape is able to offer. Essel World's Water Kingdom, Waterfront Club, Millennium Club, Matunga Gymkhana, American School, and Police Gymkhana are some of the mega projects in Mumbai. Aquascape has installed semi olympic size pools and leisure pools in several five star hotels, resorts and institutes.

Though chemical free water management is the core business, Aquascape still leads in the world of designing, constructing and turnkey projects of all types of pools, water parks and wellness.

German Water Management for Pools and Wellness

Pools & Wellness

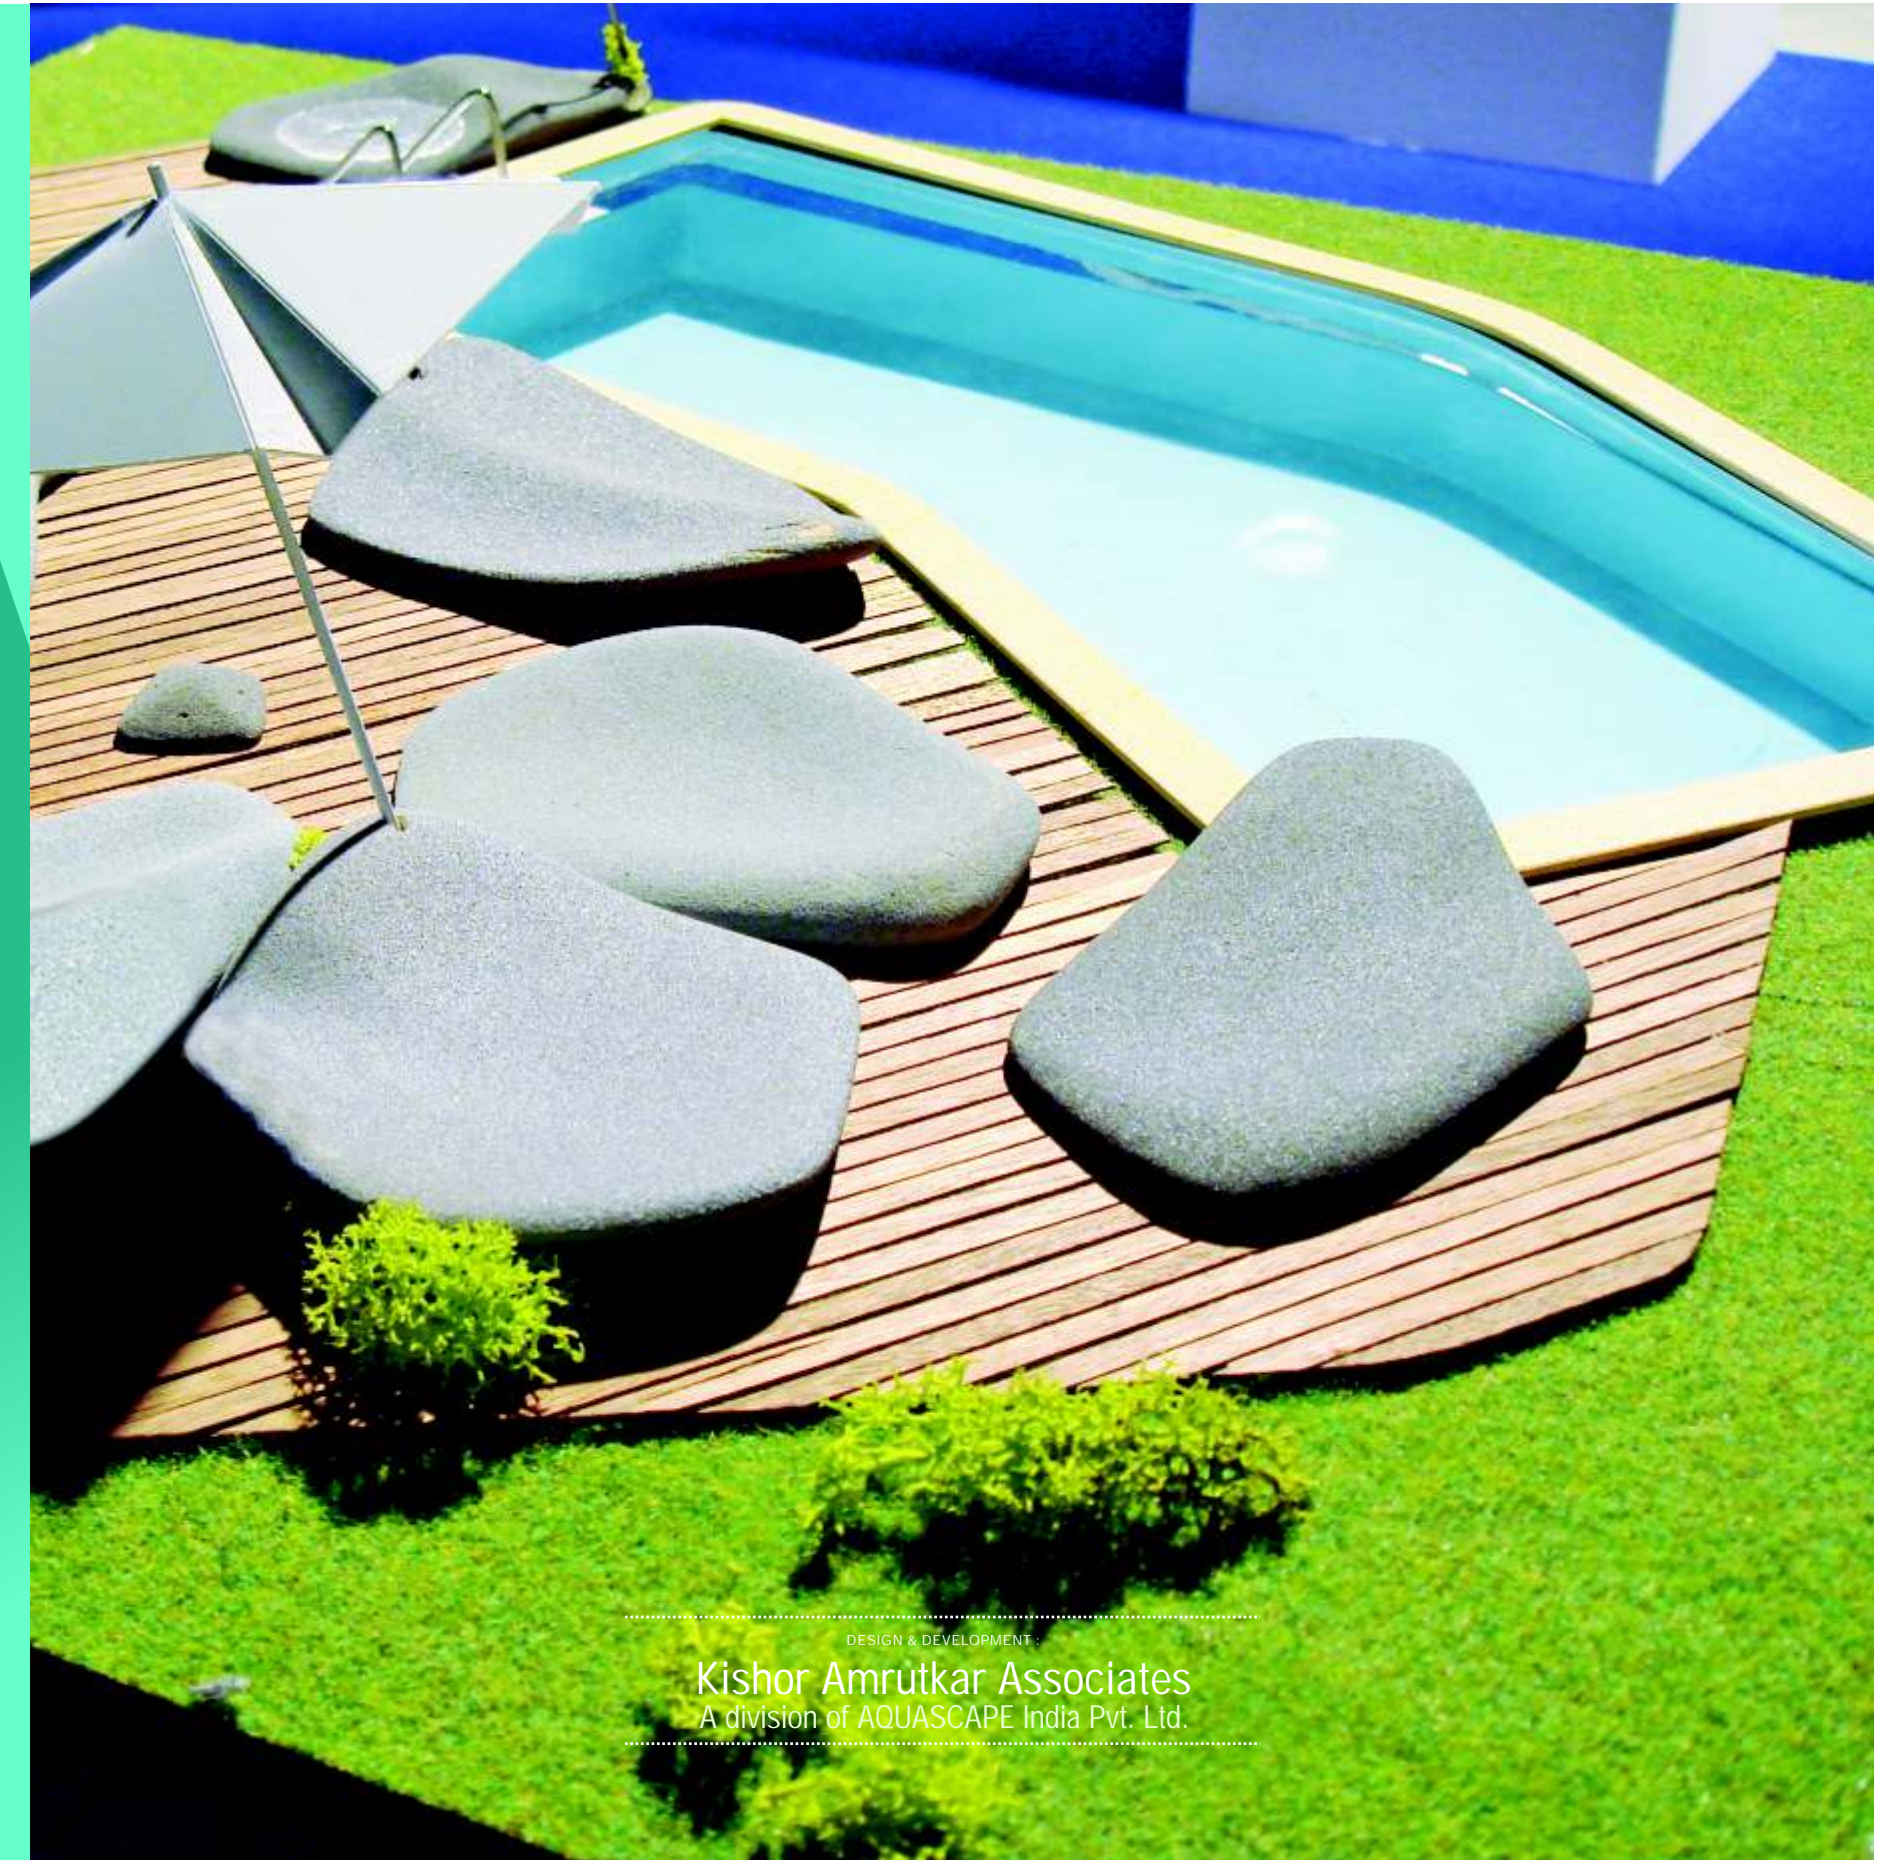

WATER FRONT CLUB, MUMBAI an AQUASCAPE project

OUR SPECTRUM OF PERFORMANCE

- ? Project-related interior spa area works taking into account construction and architectural aspects.
 - ? Individual consultation, planning and execution of pools and wellness.
 - ? Application of different pool and whirlpool systems as per individual specifications.
 - ? Use of high-quality water treatment facilities (chemical free) with high operating comfort.
 - ? Design and plan relaxing and stimulating water attractions and counter current systems.
 - ? Efficient climate and de-humidification systems including energy optimization and heat recovery.
 - ? Exclusive saunas, steam baths, heated benches, showers, fitness devices.
 - ? Design & plan swimming pool covers and roofs.
 - ? Modernization and rebuilding of existing pools.
 - ? Aquascape, having created an awareness of the perils of chlorinated water on human health & environment, offers substantial alternatives to ensure water purity naturally with little or no chemicals. dinotec's Blue Tech undivided cell electrolysis systems offer on-site production of fresh, highly active disinfection solutions with benefits like reduced chemical consumption, optimum water quality, protection of health etc.
- Aquascape has spent years researching and developing the process and is now confident that it holds the key

 Hot or Cold
 pool waters!**

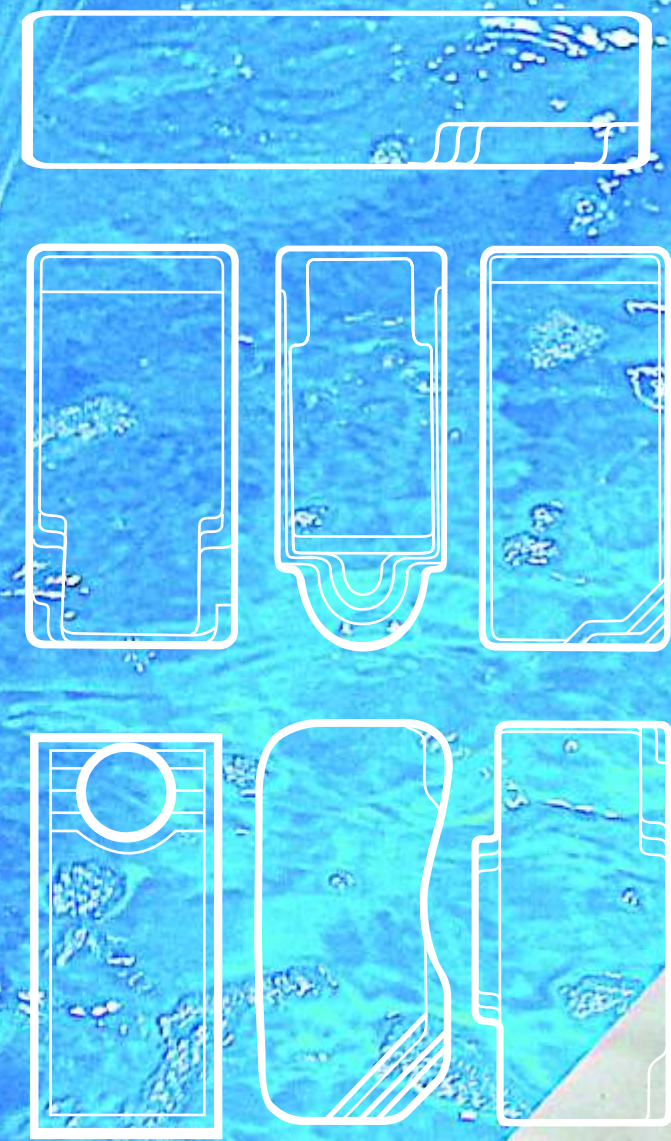

Aquaheat Pool Pumps
 AT UNBELIEVABLY LOW
 OPERATING COSTS!

Now pools with cold, 'can't-swim-waters' are a thought of the past.

Aquaheat heat pumps can simply transform winter into a warm inviting summer swimming experience at unbelievable costs! Almost the same as that of a household geyser.

Aquaheat heat pumps are close-cycle cooling systems that heat or cool pool water and they can be attached to both, new to be installed as well as existing, in use swimming pools. That's swimming made enjoyable 365 x 24 x 7!!!

Ready, Ceramic
 Swimming pool shapes

Aquascape is fast unveiling the world of unending water possibilities.

That's Spa & Wellness projects across Club houses. Hotels. Institutes. Corporate Corridors. Country Homes. City Residences. Et all.

With an informed, discerning eye that comes with an experience of over 25 years which go beyond Architectural aspects. Consultation. Designing. Development. Creation. And Construction.

Copper + Silver Ionisation WATER TREATMENT SYSTEM
Pure, Fresh & Clear Water

Ancient Greeks and Egyptians stored water in silver and gold containers to keep it fresh. Thousands of years later, NASA is still using copper-silver ionization in its space programme. This water disinfection technology has gained wide acceptance across America, Europe and Australia.

The system is derived from the centuries old principle of electro-physical water treatment based on the ionization of copper and silver: two effective natural substances for disinfection and purification. It consists of a state of the art micro processors-controlled electronic unit and patented disinfection electrodes.

This Copper-Silver ionization 100% Chemical free Water Treatment System provides natural, odourless, soft and body friendly, water thus making hazardous irritations to eyes, skin, and airways along with unpleasant odours, repetitive pH- and chlorine level checks and costly maintenance, things of the past.

Small wonder then, this technique is used in thousands of pools and wellness domains where lasting disinfection of bacteria, viruses and algae is required.

Stop using chemicals in your pool.

COMPARISON CHLORINE / IONISATION

Comparison with the standard water disinfection method

Chlorine	Copper/Silver
1. Reddened, irritated eyes.	1. No eye irritation.
2. Dry, rough skin.	2. Silky-soft skin.
3. Marked odour.	3. Odourless water.
4. Respiratory tracts irritation.	4. Water contains no irritants.
5. Chlorine is hazardous.	5. Copper is healthy (essential).
6. Needs flocculator application.	6. Natural flocculation.
7. Needs add-on agents (winter).	7. No additional agents needed.
8. Needs add-on algaecides.	8. No additional algaecides.
9. Needs storage/replenishment.	9. No storage required.
10. Needs chlorine-level checks.	10. Copper-level check 3 monthly.
11. Risk of chemical burns from liquid chlorine.	11. Fully automatic and safe discharge of ions.
12. Needs additional agents to regulate pH level.	12. No additional agents needed to regulate pH level.
13. Corrosion risk (pool materials and environment).	13. No corrosive effects (pool materials and environment).
14. Low buffer capacity.	14. Constant discharge of ions.
15. Annual replacement of chlorinated water.	15. Replacement of water not required.
16. Replacement of filter sand every 2-3 years.	16. Replacement of filter sand every 10 years.
17. Rapid loss of efficacy if exposed to strong sunlight.	17. Efficacy not affected by environmental conditions.
18. Backwash water must be disposed.	18. Backwash water ideally suited for irrigation of plants.

Average copper levels in food

AQUASCAPE : Disinfected Water 0.5 - 0.7 mg/l

cow milk :	0.4 mg/kg	potatoes :	2.2 mg/kg
poultry :	3.4 mg/kg	cabbage :	1.5 mg/kg
eggs :	2.5 mg/kg	dried vegetables :	9.0 mg/kg
white bread :	2.0 mg/kg	nuts :	5.0 mg/kg
oat flakes :	8.8 mg/kg	apples & pears :	0.9 mg/kg
rice :	1.8 mg/kg	banana :	1.3 mg/kg

Water is life

ENSURE ITS PURITY NATURALLY, WITHOUT CHEMICALS

Copper-Silver Ionisation

Within just a fraction of a second, the positively charged copper and silver ions form electrostatic bonds with the negatively charged areas of the cell walls of the micro-organisms, impairing the micro-organism permanently.

Once copper and silver penetrate an algae or germ cell, they attack the sulphur based amino acids in the cell proteins required by the cell for photosynthesis. As a result the cell dies. Cryptosporidium, E.coli, coliforms, pseudomonas and legionellae and many other species of bacteria and germs including chlorine resistant varieties are instantly eliminated. For this reason, electro-physical water disinfection is one of the most common alternatives to conventional 'chemical warfare'.

Other Applications

Where control of waterborne bacteria is needed : • Grey water tanks • Holding tanks • Water systems in hospitals, hotels, resorts, commercial complexes • Green buildings • Plant nurseries etc.

AQUASCAPE brings you

Low Cost Compact

FILTRATION SYSTEM
for Swimming Pools

- Compact machine!
- Quick installation!

This multifunctional filtration unit has all functions built in and is very easy to install.

- **Aesthetic**

The compact design blends well with a pool environment.

- **Simple**

Automatic operation, no daily supervision required.

- **Effective**

Filtration for pure & healthy water.

- **Economic**

No investment in building plant room.

- **Modular**

It's modular aspect enables you to buy a unit with full options straight off or progressively in several phases.

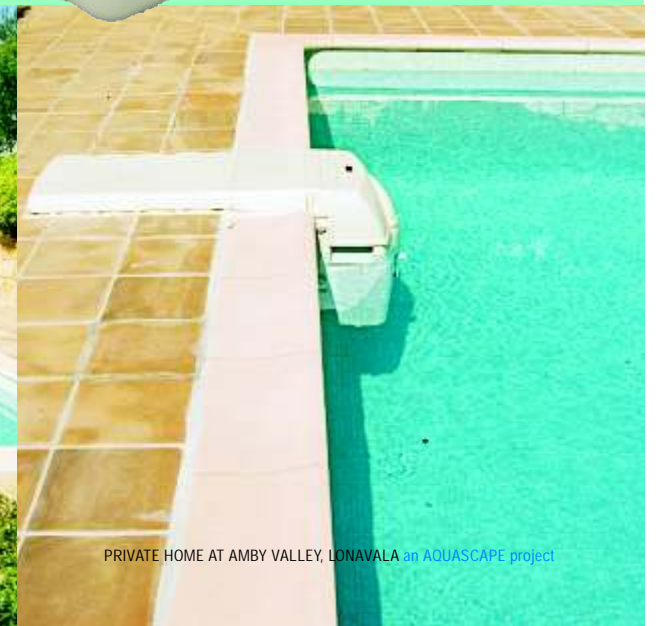

The UV+Copper ionization treatment combines two proven physical procedures; ultra-violet light and ionization to effectively disinfect and neutralize bacteria, fungi and viruses immediately and give you crystal-clear, germ free water with no change in taste and smell.

At first, the water flows through the UV chamber where the UV light kills all possible bacteria, viruses, legionella and other germs. The water is now germ free.

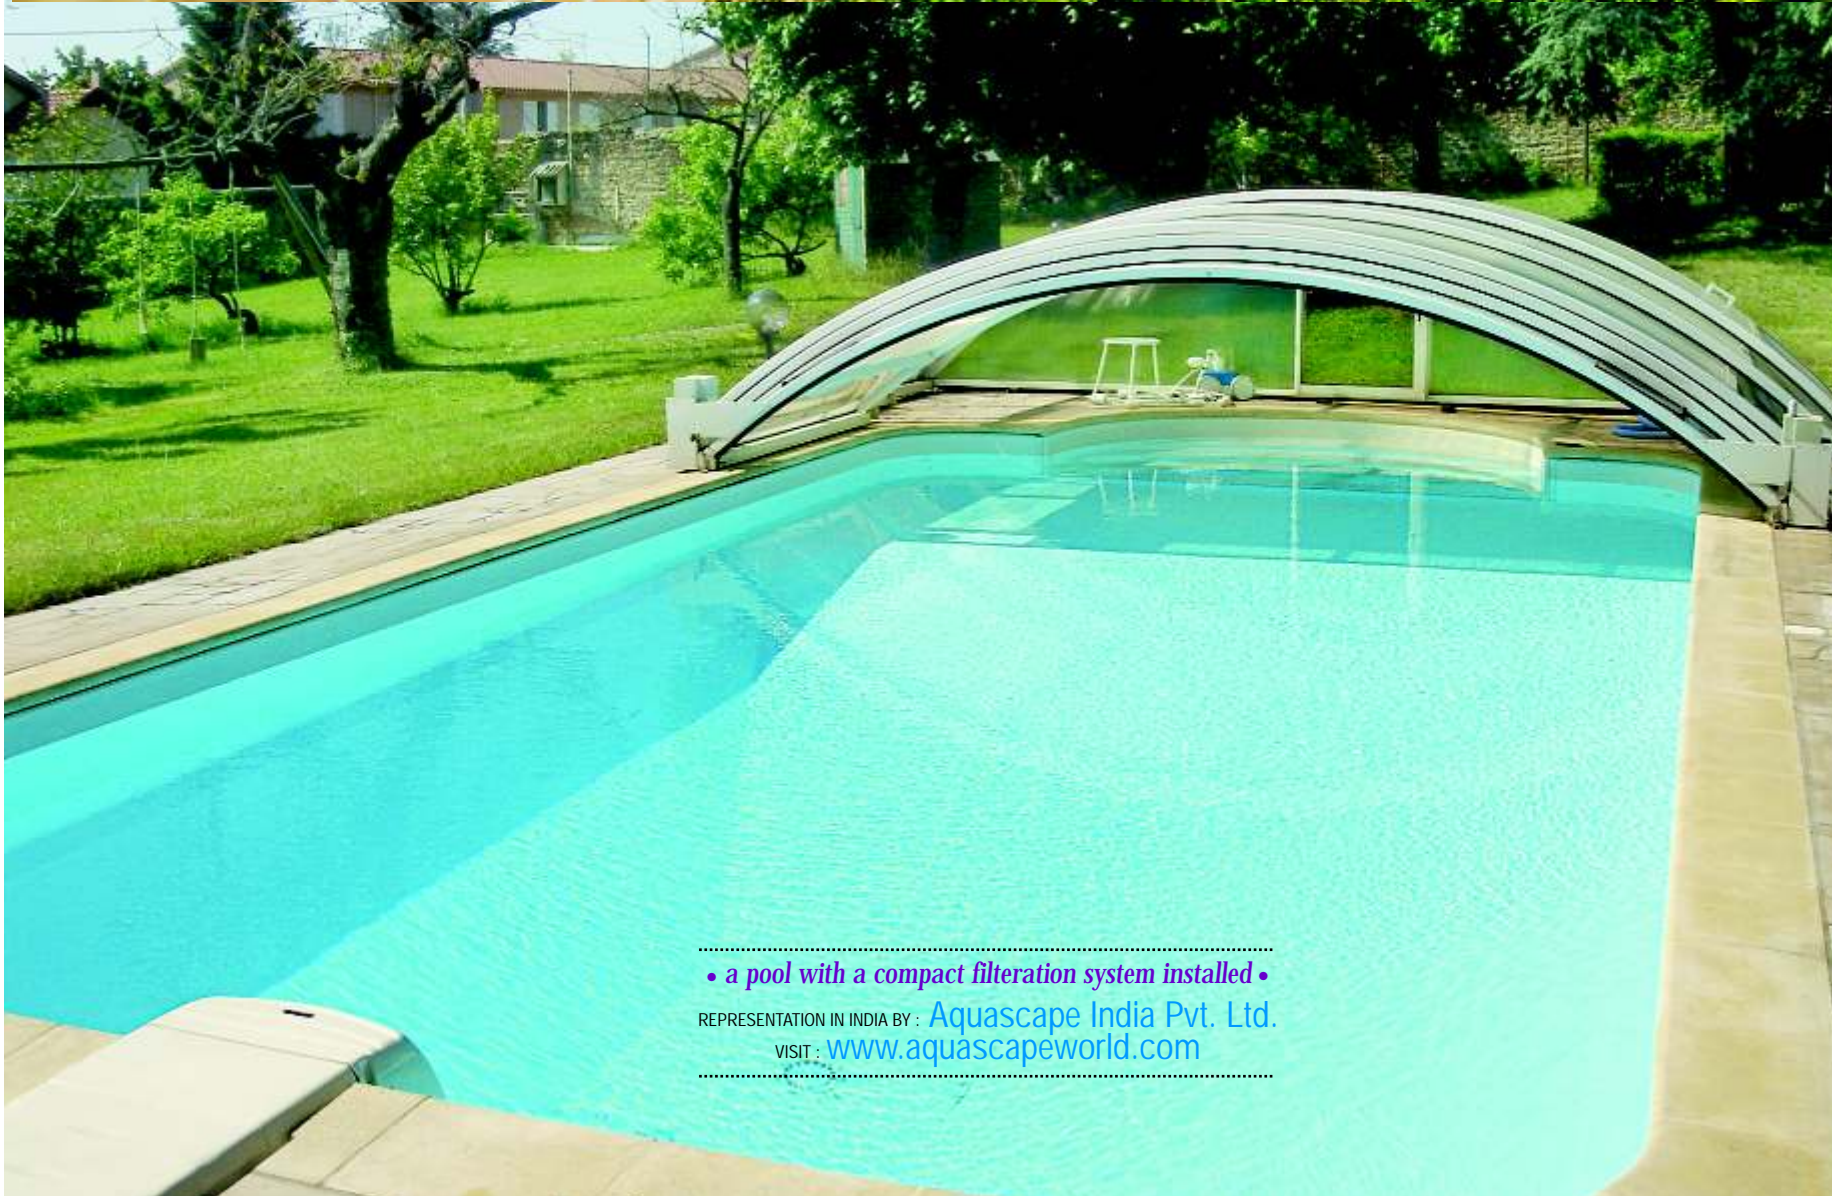

However, pathogens get into the water by bathing and the environment. At this stage, positively charged copper ions arrive into the water, in order to protect it effectively from further growth of pathogens. All quality requirements of drinking water are retained without using chemicals like chlorine.

UV + Copper
 WATER TREATMENT SYSTEM
 No Chlorine - No Tears

The UV + Copper ionization treatment combines two proven physical procedures; ultra-violet light and ionization to effectively disinfect and neutralize bacteria, fungi and viruses immediately and give you crystal-clear, germ free water with no change in taste and smell.

At first, the water flows through the UV chamber where the UV light kills all possible bacteria, viruses, legionella and other germs. The water is now germ free.

However, pathogens get into the water by bathing and the environment. At this stage, positively charged copper ions arrive into the water, in order to protect it effectively from further growth of pathogens.

All the quality requirements of drinking water are retained without using chemicals like chlorine.

The UV + Copper water purification is an innovative, reliable compact unit, which is simply attached behind the filter on the piping of the return flow to the basin. The process saves upto 80% of the operating cost, contrary to other disinfection procedures. It is environment friendly and almost maintenance free, simple to install and with problem free expandability.

AQUASCAPE brings you Pools with iQ

READYMADE CERAMIC POOLS.

The freedom to swim anytime!
 Any season! Even winter!
 In temperature controlled waters

- World's first Ceramic Composite Pool Technology.
- World's first brilliant bi-luminite colour finish creating water colours of unmatched depth and luminosity.
- World's first vantage in-floor cleaning and circulation system.
- Self supporting pool technology.

Advantages

- Exclusive 3D shiny surface, no pores.
- Lifetime guarantee for osmosis (absolute impermeability).
- Ceramic core enhanced firmness without any loss of flexibility.
- Quick and easy installation.
- Built-in without a concrete foundation plate.
- Pool quality guaranteed, permanent control of the production process.

Design features

- Elegant, contemporary, geometric, free shaped pools.
- Wide steps and integrated relaxation area where massage nozzles may be installed.
- Perimeter grip rail and step ledge around the pool.
- Relaxation zone in deeper part of pool.
- Self cleaning system can be installed.

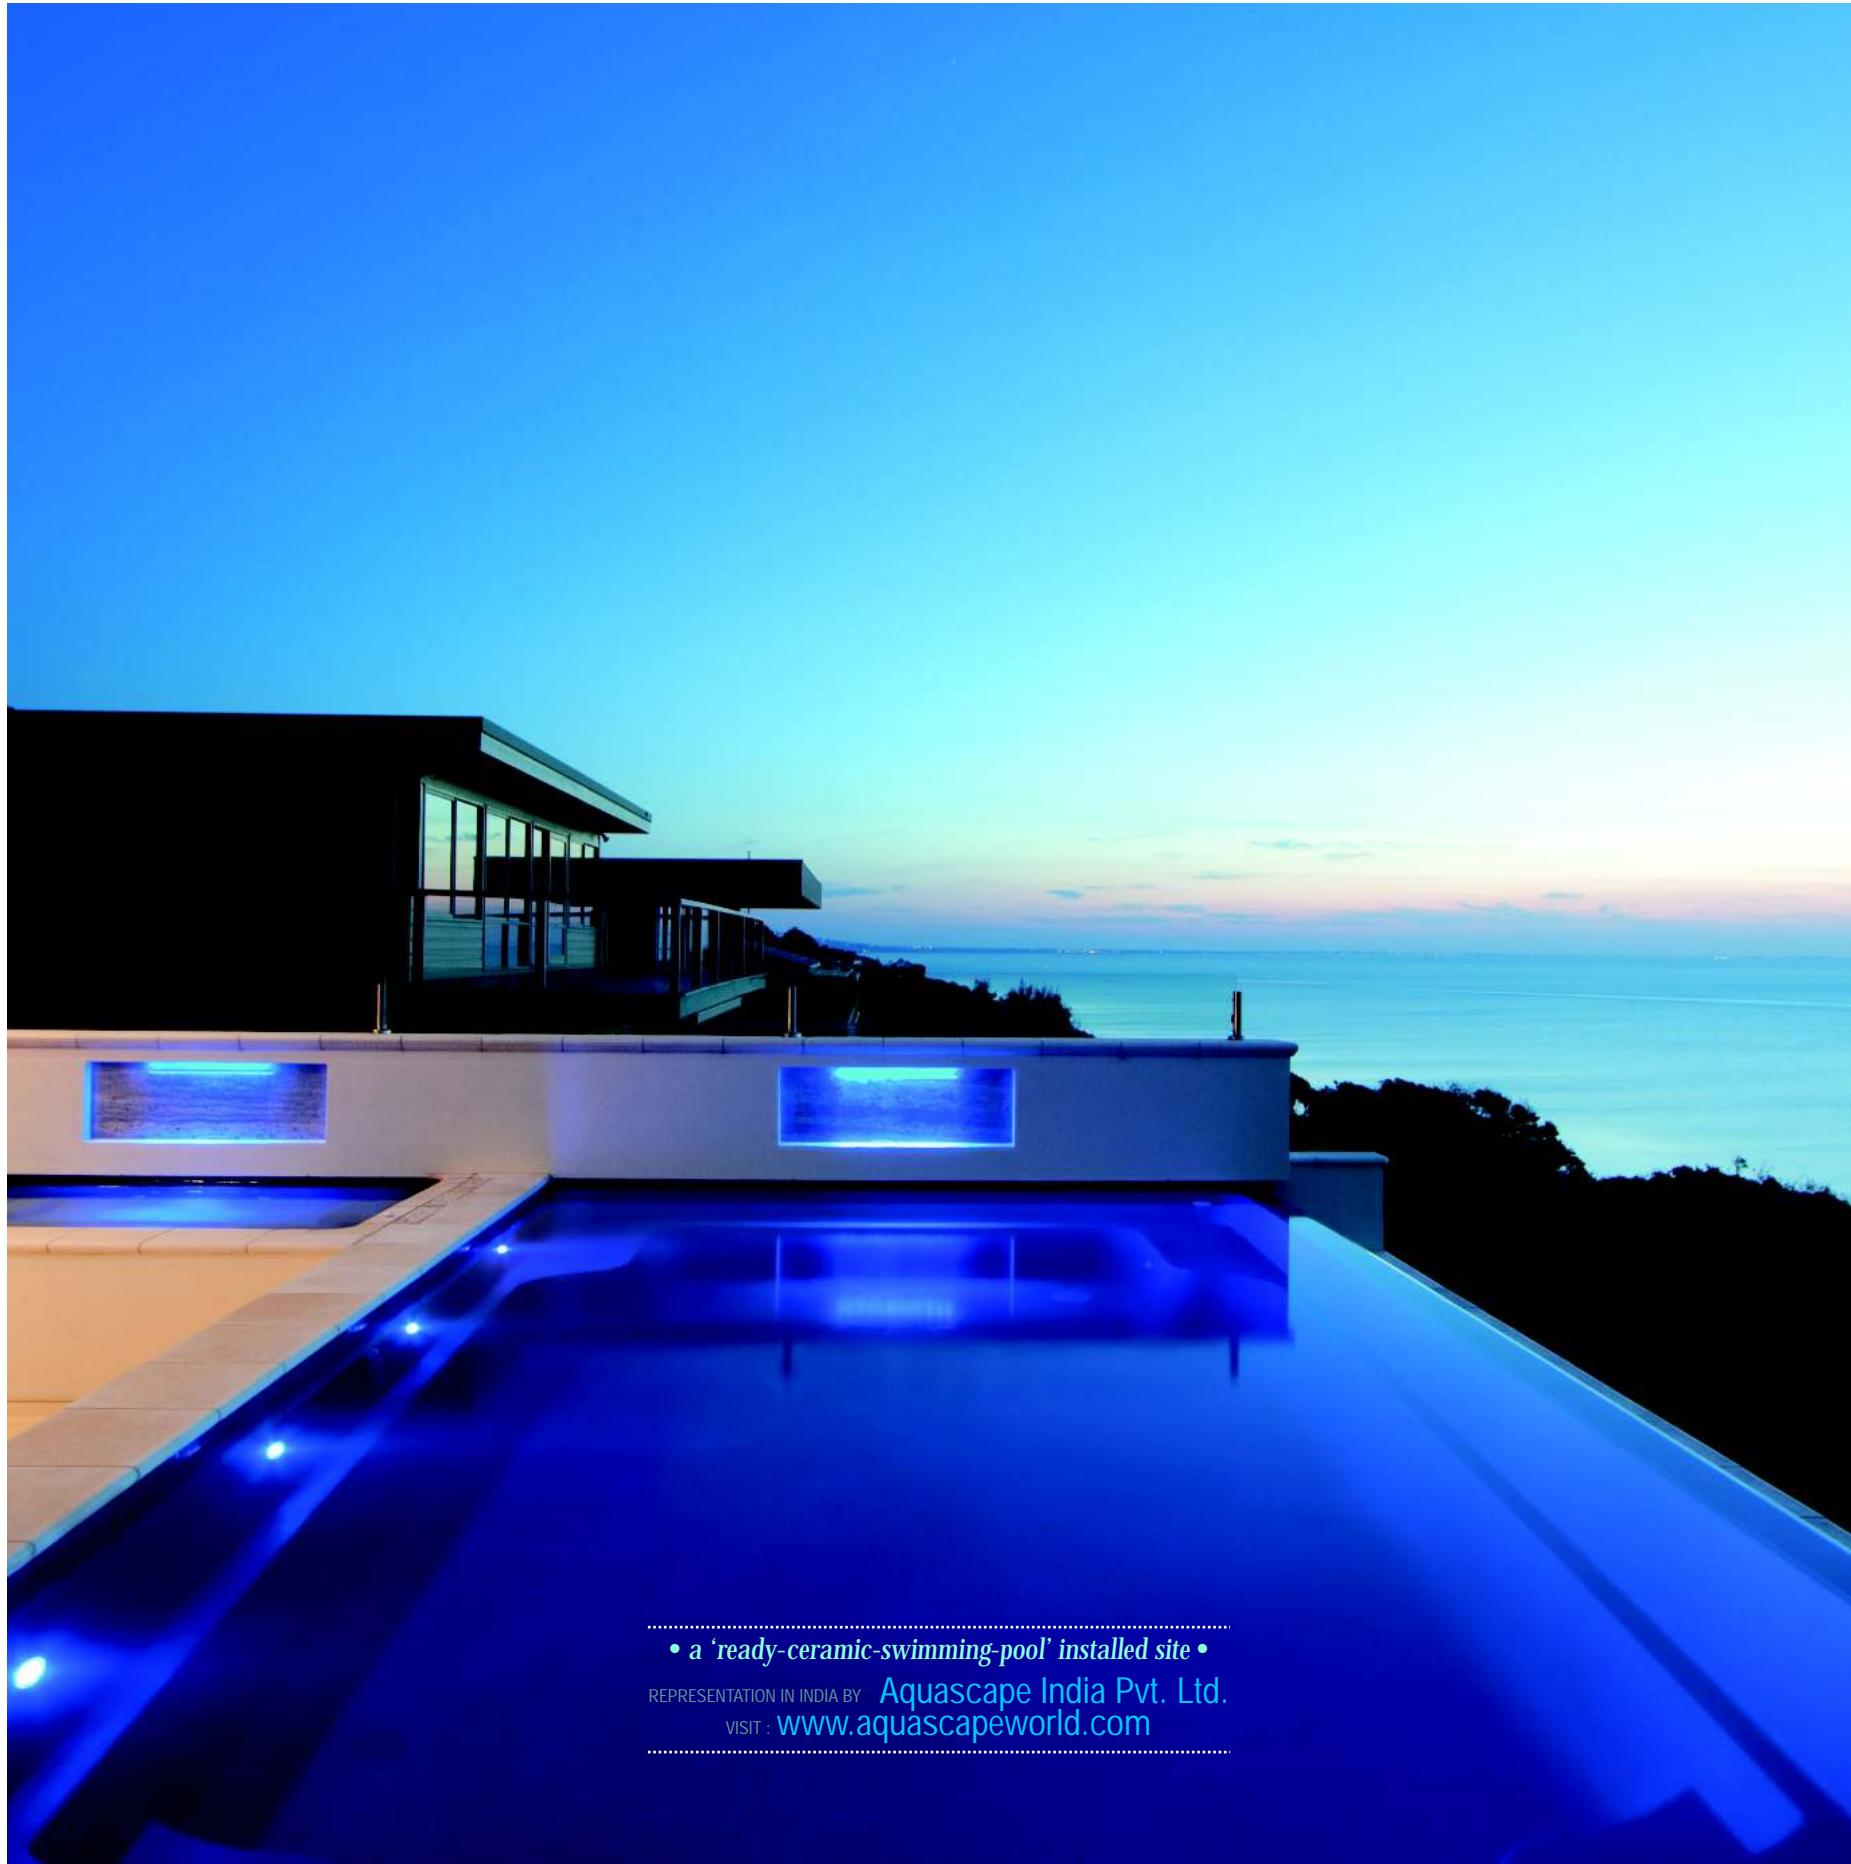

Why is it called the Pool with an iQ?
 This Intelligent Pool has a computerized remote control system that initiates operations.

Technical and Customer benefits:

- Real time analysis and water management.
- Display pool water information.
- Temperature set up.
- Control over lighting, massage and water features.
- Covering of pools.
- Swim jet.
- Complex chemical and technical analysis.

AQUASCAPE brings you
80% reduced Chemical Usage in pools!
UV Water Disinfection
 WATER TREATMENT SYSTEM
 Sparkling clear water!

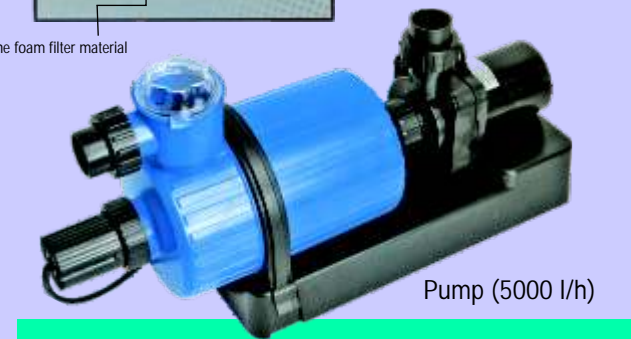

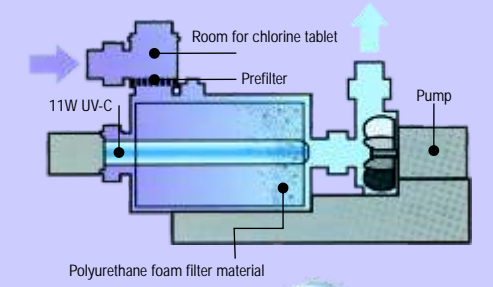

Sparkling clean water despite 80% reduced chemical usage.

Significantly reducing the need for pool chemicals whilst giving almost total virus protection and producing water that is sparkling clear, UV Water Disinfection Systems offer amazing benefits:

- Crystal clear water & fresh clean air.
- Pleasant bathing environment, no eye or skin irritation.
- UV is effective against all micro-organisms.
- Breaks down chloramines and other organics.
- Perfect for kids and allergy sufferers.
- UV is non hazardous, green technology and far more environment friendly than standard methods.
- Automated system cannot be overdosed and reduces maintenance time.
- Measurable cost savings in chemicals, energy etc.
- Intelligent system tells you when electrodes need attention or changing.
- The backwash water can be used to water the garden.
- Facility to programme pool size in gallons and litres.

Low cost UV ionization system!

AQUASCAPE offers three UV Water Disinfection Systems

- 1. UV :** Built in electronic pre-selector ensures smooth power supply. Upto 35% more UV yield as a result of reflection. Includes a Phillips Ultraviolet lamp.
- 2. Ozone+UV :** All features of the UV and benefits of ozonation. Lamp has double function, produces ozone and UV light at the same time. Powerful disinfection process achieved through oxidation & sterilization.
- 3. UV+Ionizer :** This revolutionary combination of UV, dosing pump and copper electrolysis means having a chlorine free pool. The ionizer unit as part of your pool system can keep your pool water fresh, hygienically clean and crystal clear.

FOR BETTER AIR QUALITY
 UV Air Disinfection Unit

How important is the air for us?
 Clean, fresh air results in better work performance, a feeling of fitness and good health. So get rid of viruses, bacteria and moulds. Disinfect the air we breathe.
 UV Air Disinfection Unit is a revolutionary new air cleaning product with an air filter, an air ionizer and a UV- sanitizing light in one professional system. Now easily eliminate bacteria, viruses, moulds, pollen and dust particles from the air you breathe.
